Equitrac Further Innovates Professional Services' Print & Cost Management with the Integration of Worldox DMS

Ability to scan direct simplifies workflows and improves cost recovery

WASHINGTON DC, ILTA – August 25, 2009 – World Software Corporation and Equitrac today announced the development of an innovative document capture solution for professional services firms. The integration brings together two best-in-class flagship products — Equitrac Professional® 5 and Worldox GX® Document Management Software (DMS) — to help law firms streamline their document scanning process, increase productivity and enhance document workflow.

“The Equitrac partnership will allow us to deliver greater value to our thousands of legal customers around the world,” said Ray Zwiefelhofer, Executive Vice President of World Software Corporation. “Firms large and small are all seeking ways to remove wasted steps and save time. The convergence of these two products creates a solution that will certainly enhance our clients’ workflow and productivity.”

Through the TouchPoint Console®, Equitrac Professional® clients simply login to the console at the Multifunction Device (MFD) and then enter the billing information and profile fields. This enables users to scan, allocate costs, and directly file a document into the Worldox™ DMS, eliminating the multiple steps previously associated with this process. For example, the billing information is now a one-time data entry, reducing the probability of cost allocation errors.

Additional key benefits include the reduction in the number of steps and the scanning software required. Equitrac software also reduces the number of physical steps required for scanning to the DMS. In the past, a firm would need a third party scanning product to accomplish the process.

“This innovation is representative of Equitrac’s commitment to its AmLaw customers by increasing their productivity and profitability,” said Fred Whiteside, Vice President of Product Development for Equitrac Corporation.

The Worldox integration is planned for release early next year. To reach Equitrac, please call 1-800-327-0183, or email sales@equitrac.com. For information about World Software Corporation and its products, please visit www.worldox.com or call 1-800-962-6360.

About World Software Corporation & Worldox Software

World Software Corporation is an innovative leader in the Document Management Systems (DMS) category. World Software's flagship product, Worldox GX®, is increasingly becoming the DMS of choice among law firms and legal departments. With an installed base of more than 3,000 law firms, Worldox/World Software customers range in size from 1 to 1200 users. Founded in 1988, World Software Corporation is based in the New York Metropolitan area.

About Equitrac Corporation

Making documents count for over 30 years, Equitrac is the world's leading provider of solutions to authenticate, authorize and account for use of today's multifunction printers, copiers, faxes and scanners. We are home to the industry's best-funded R&D program, global alliances with leading manufacturers and the largest team of print management experts in the world. Equitrac device-embedded and terminal-based software works with all leading manufacturers' equipment, and supports systems already in use, including college and university campus card systems, providing measurable results for any organization that needs to make networked printing more manageable, economical, convenient and secure. Visit Equitrac at www.equitrac.com.
